

# GOKb training session: Review Requests

**Check if the reference title has a print-ISSN erroneously marked as eISSN or vice versa and correct those identifiers if necessary. If the package title identifiers are wrong, please contact the provider of the KBART file and ask for the information to be fixed.**

**Package Title to review**

Journal of Evidence-Based Integrative Medicine ✎

Package: SAGE Journals Premier 2008

# Overview:

- ❖ Background information
- ❖ The purpose of review requests
- ❖ Where to find the review requests
- ❖ Structure of the review requests
- ❖ Categories of the review requests
- ❖ Focus: 5 important categories

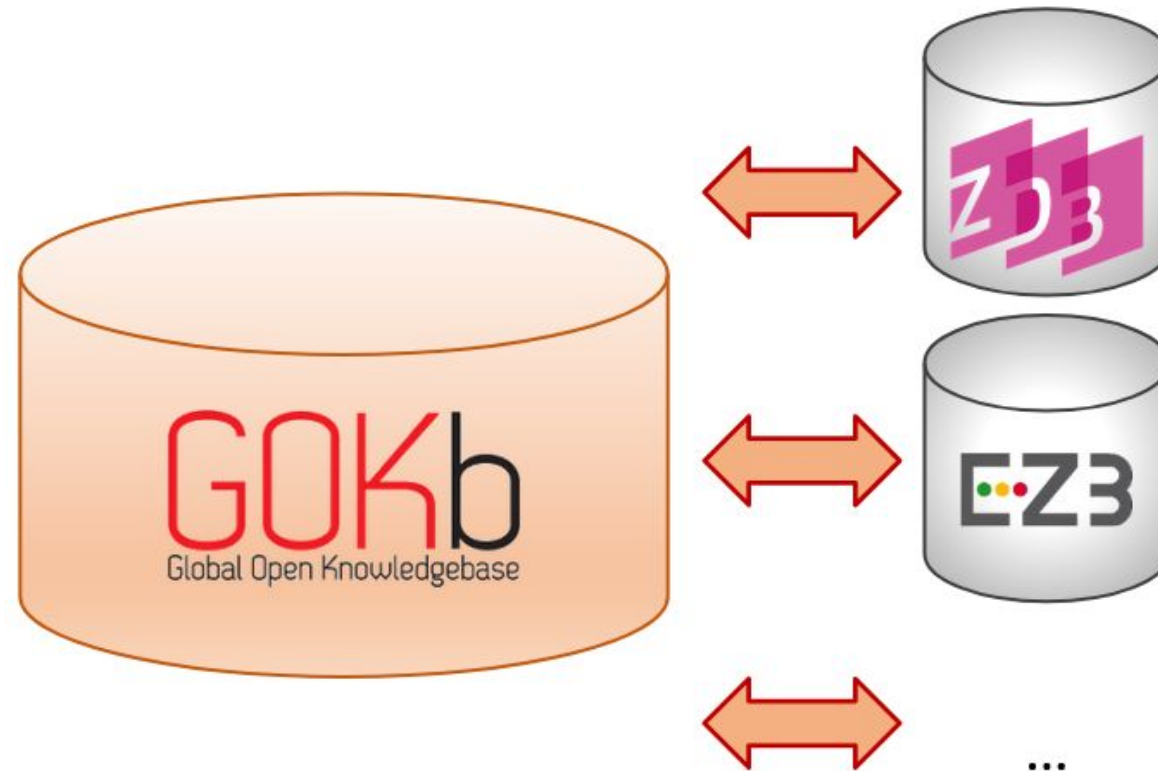

# Background information

- ❖ Every package title, given by a KBART date row, is referencing a bibliographic title.
- ❖ Different package titles may be referencing the same bibliographic title.

# Background information

- ❖ Titles are enriched with identifiers of ZDB & EZB by querying their APIs.

# Background information

- ❖ There is a fundamental dilemma: The package titles of the providers often do not match with the bibliographic title.

- ❖ GOKb solution:
  - The bibliographic titles serves as „master“ title (reference title) and provider's package title is compared to master title.
  - Master title is enriched with further bibliographic data.
  - Correction of erroneous entries via review requests

# The purpose of review requests

- ❖ Identify and structure inconsistencies
- ❖ Inform users about these Inconsistencies
- ❖ Provide instructions and notes so that curatory groups can work on them and clean them up as independently as possible.

**Note:** Simple information and feedback is also reported back in the form of review requests.

# Where to find review requests

- ❖ On the dashboard
- ❖ In the package view
- ❖ In the review view

**Note:** You have to be logged in to see and edit the review requests of your curatory group!

# Where to find review requests

On the dashboard:

The screenshot shows the GOKb dashboard interface. On the left is a navigation sidebar with options like 'Create Package', 'Create Reference Title', 'Create Provider', 'Create User', 'Packages', 'Reference Titles', 'Providers', 'Reviews', 'Users', and 'KBART Validator'. The main content area is titled 'Dashboard' and features two sections: 'Reviews (EZB)' and 'Imports'.

**Reviews (EZB)** section:

- Count: 180
- Status filter: Open
- Action: MARK 0 REVIEWS AS DONE
- Table with columns: Component to review, Type, Category, Status, Date Created, and edit/delete icons.

Component to review	Type	Category	Status	Date Created
<a href="#">Forum of Nutrition</a>	Package Title	ISSN Conflict	Open	2023-05-15 19:47:26
<a href="#">Monographs in clinical neuroscience</a>	Package Title	ISSN Conflict	Open	2023-05-15 19:47:28
<a href="#">Nestle Nutrition Institute workshop series Pediatric program</a>	Package Title	ISSN Conflict	Open	2023-05-15 19:47:30
<a href="#">Physical Oceanography</a>	Package Title	ISSN Conflict	Open	2023-05-15 19:54:49

# Where to find review requests

In the package view:

The screenshot displays the GOKB package view interface. On the left is a navigation sidebar with options like 'Create Package', 'Create Reference Title', 'Providers', 'Reviews', and 'Users'. The main content area is divided into four tabs: 'Summary', 'General', 'Package Properties', and 'Package Titles'. The 'Summary' tab is active, showing package details for 'Springer:Ebooks:ComputerScience:2018'. Below this, there are sections for 'Curatory Groups' (0) and 'Reviews' (6). The 'Reviews' section includes a table of review requests.

# Structure of the review requests

## Review – ISSN Conflict ✕

Date Created: 2022-05-16 10:33:28      Status: Open      Curatory Groups: SAGE

Action taken  
The GOKb created p-ISSN and e-ISSN with the same value.

Cause  
The package title has an e-ISSN that corresponds to an existing p-ISSN of the reference title, or vice versa.

**i** In the package title, check if a p-ISSN has been marked as an e-ISSN or vice versa and correct it by deleting the incorrect ISSNs. You can add new identifiers by opening the detailed view of the title in a new tab by clicking on the title. Likewise, check the reference title and correct the ISSNs there. If the package title was imported via a KBART file, contact the provider and point out the incorrect ISSN.

### Package Title to review
